

Corrections to Inventory of Long-Term Care Facilities
April 11, 2008

The following ICF/DD facilities were not included in planning areas totals:

Lincoln Estates 1, Lincoln - HSA 3	10 ICF/DD beds
Lincoln Estates 2, Lincoln - HSA 3	10 ICF/DD beds
Lincoln Estates 3, Lincoln - HSA 3	10 ICF/DD beds
Lincoln Estates 4, Lincoln - HSA 3	10 ICF/DD beds
Alden Springs, Bloomingdale - HSA 7	16 ICF/DD beds
Ave Maria House, Chicago - HSA 6	12 ICF/DD beds
Coleman House, Chicago - HSA 6	12 ICF/DD beds
Connelly Home, Chicago - HSA 6	16 ICF/DD beds
Marklund at Mill Creek #3, Geneva - HSA 8	16 ICF/DD beds
Marklund at Mill Creek #4, Geneva - HSA 8	16 ICF/DD beds
Peterman House, Chicago - HSA 6	12 ICF /DD beds

The section on ICF/DD facilities has been corrected and these facilities are now included.

INVENTORY OF HEALTH CARE FACILITIES AND SERVICES AND NEED DETERMINATIONS

Planning Areas for General Long-Term Care Nursing Care Category of Service

For the General Long-Term Care-Nursing Care Category of Service:

1. Planning areas have been established as depicted above and on detailed maps on following pages.
2. Occupancy target rates are 85% for modernization, 90% for additional beds.
3. Bed need for a planning area is calculated by first determining the minimum and maximum rates of utilization for the entire Health Service Area (HSA) where the planning area is located. These rates are determined for three age groups: 0-64 years, 65-74 years and 75 and over, by dividing the base year patient days for the age group by the HSA estimated base year population for that age group. Minimum and maximum rates are set at 60% and 160% of the calculated HSA rate, respectively.

Calculations are then made of the planning area rates of utilization for the three age groups. The calculated planning area rates are compared to the minimum and maximum rates for the HSA. If the planning area rate is less than the minimum, the minimum rate is used; if the area rate exceeds the maximum, the maximum is used; otherwise, the area rate is used.

INVENTORY OF HEALTH CARE FACILITIES AND SERVICES AND NEED DETERMINATIONS

For each age group, the rate being used is multiplied by the projected area age group population ten (10) years from the base year to calculate projected age group patient days. The sum of these calculated patient days is first divided by 365 to determine the projected Average Daily Census, which is divided by 0.9 to adjust for the 90 percent target occupancy rate, to determine the projected number of beds needed for the planning area.

Data Sources:

- 2005 population estimates prepared by Illinois Center for Health Statistics, Illinois Department of Public Health
- 2015 population projections based upon the latest county-level numbers prepared by Illinois Department of Commerce and Economic Opportunity and tabulated or disaggregated to Illinois Health Facilities Planning Board health planning areas by the Illinois Center for Health Statistics, Illinois Department of Public Health
- 2005 health services utilization rates are based upon data provided by health care facilities in response to the Annual Long-Term Care Facility Questionnaire, administered by the Illinois Department of Public Health

Category of Service

Planning Areas for Long-Term Care for Developmentally Disabled Adults

1. For facilities licensed as ICF/DD 16-bed or fewer, total bed need and the number of additional beds needed are determined by dividing the planning area's projected adult developmentally disabled population by 21.4 to determine the total number of beds needed for developmentally disabled adult residents in the area. The number of additional beds needed or excess beds is determined by subtracting the number of existing beds in ICF/DD 16-bed or fewer facilities from the total number of beds needed for developmentally disabled adult residents in the planning area.

<u>Projected Number of Developmentally Disabled Adults in year 2015 – HSA 1</u>	<u>DMH/DD Divisor</u>	<u>Number of “ICF/DD 16-bed or fewer” Beds Needed – HSA 1</u>
5,493	21.4	257

The number of beds needed, 257, is compared to the sum of the existing and permit beds in the area, 360, to determine that there is an excess of 103 beds in that area.

2. For ICF/DD facilities with more than 16 beds, no bed need formula has been established.

Inventory of Health Care Facilities and Services and Need Determinations
State Summary of Specialized Long-Term Nursing Care Beds,
Bed Need and Additional Beds Needed/Excess Beds by Planning Area

Intermediate Care for Developmentally Disabled Adults
